### 1. Mission & Vision Statement

#### *Vision Statement*

The Information Systems Department was established in 1999 to prepare qualified cadres in the field of building systems and information bases to supply state departments with expert cadres in order to develop the software industry in the country and to keep abreast of the tremendous developments in this field and to deal with modern technologies and information network. The main interest of the department is focused on the software industry in the country and keeping pace with The tremendous developments in this field and dealing with modern technologies and the information network, and the main concern of the department is to study all technical issues, issues of senior management, planning policies and decision-making associated with the employment of computers in the establishment of information systems for major institutions, and the department deals with the theoretical and practical aspects related to the description, analysis, design, implementation and management of systems Information while maximizing the utilization of the information and communication technology infrastructure.

#### *Mission Statement*

The Information System Department academic staff pursues a multifaceted charge at University of Anbar. The Program seeks to provide all Information System Department students with fundamental knowledge of Information System, as well as a deeper understanding of a selected focus area within the Computer sciences. The curriculum and advising have been designed to prepare graduates for their professional future, whether they choose to work as Information System specializing in botany or wildlife, or to pursue advanced degrees in the Information Technology. The Information System program also provides the necessary fundamental knowledge of the Computer sciences to support the

Computer Science degree, the Network Technology degree, and the Artificial intelligence degree in Forest Technology. In addition, Information System courses provide a key laboratory science experience for those students seeking to complete the general education requirements

## 2. Program Specification

<b>Programme code:</b>	BSc-BIO	<b>ECTS</b>	240
<b>Duration:</b>	4 levels, 8 Semesters	<b>Method of Attendance:</b>	Full Time

Information System is a wonderfully wide-ranging subject and is well equipped to deliver. The emphasis of the program is the whole organism to which everything is related, be it the molecules that form proteins or communities of organisms in an ecosystem. The degree is popular - –or some it's' the breadth of the subject that appeals, for others it's a path to specialization. All students have the opportunity to transfer onto our specialist degrees in Information System at the end of the first year.

Level 1 exposes students to the fundamentals of Information System, suitable for progression to all programs within the Information System program group. Program-specific core topics are covered at Level 2 preparing for research-led subject specialist modules at Levels 3 and 4. The University Information System graduate is therefore trained to appreciate how research informs teaching, according to the University and School Mission statements.

At Levels 2, 3 and 4 students are able to study a range of modules which are selected, that reflect the complexity of life forms from Data Structure , information security, Networks , to free to choose more than half of their module credits with the proviso Artificial Intelligence to ensure the breadth of knowledge expected of a graduate with Information System degree. This allows students to develop their own wide-ranging interests in Information System and Data Science. Decisions on what to study are made with input from personal tutors.

The research ethos is developed and fostered from the start via practical's, which are either embedded in lecture modules or taught in dedicated practical modules, research seminars and tutorials. There is a compulsory field course in Level 1, which students must pass in order to progress into Level 2, and optional field courses in Levels 2, 3 and 4. At Level 4 all students carry out an independent research project, which may be a 8 credit library or data analysis project, or a 8 credit field or laboratory based project.

Academic tutorials are held at Levels 1 and 2 with the same tutor, who is also the personal tutor, providing continuity and progressive guidance. Level 1 and 2 tutorials include a number of workshops to teach skills, e.g. library use and presentation skills, followed by assessed exercises, e.g. essays and talks, as opportunities to practice these skills in a subject-specific context.

International years and Industrial placements are also offered and individual needs are discussed with the appropriate tutor and accommodated wherever possible.

### 3. **Program Objectives**

1. The department aims to prepare qualified cadres in the field of building systems and databases to provide state departments and institutions with expert cadres, in a way that develops the software industry in Iraq, keeping abreast of the tremendous developments in this field, and dealing with modern technologies and the information network. To be able to study the problems and challenges in the field of information systems science and technology.
2. Prepare the student systematically
3. Enable the systems analyst to lead a software team to prepare a computer system that solves the problems of users and beneficiaries.
4. Developing the students' mental abilities through analysis and logical deduction, and enabling them to solve programming problems
5. The necessary development of school curricula to ensure the integration of recent changes in computer science technology and e-learning applications.
6. Encouraging innovative ideas and projects and developing leadership and creative skills in the field of information technology by urging students to participate in computer events and forums.

### 4. **Student Learning Outcomes**

Information System is the study of the organization and operation of life at business and organizations levels. Graduates obtain information on how to collect, retrieve, process, store and disseminate information for the purpose of facilitating planning , control , analysis ,coordination and decision making in business and other organizations. The Department offers a Bachelor of Science in Information system. Additionally, the Department offers courses to a large number of students from other departments and supports pre-professional programs. The Information System curriculum and experiences are designed to prepare students, in part, for entry into professional Technology programs, graduate studies, technical careers and education

#### **Outcome 1**

##### *Identification of Complex Relationships*

Graduates will be able to illustrate the structure and function of information systems components and explain how they interact in a living cell.

#### **Outcome 2**

##### *Oral and Written Communication*

Graduates will be able to formally communicate the results of technology investigations using both oral and written communication skills.

### **Outcome 3**

#### *Laboratory and Field Studies*

Graduates will be able to perform laboratory experiments and field studies, by using scientific equipment and computer technology while observing appropriate safety protocols.

### **Outcome 4**

#### *Scientific Knowledge*

Graduates will be able to demonstrate a balanced concept of how scientific knowledge develops, including the historical development of foundational theories and laws and the nature of science.

### **Outcome 5**

#### *Data Analyses*

Graduates will be able to demonstrate scientific quantitative skills, such as the ability to conduct simple data analyses.

### **Outcome 6**

#### *Critical Thinking*

Graduates will be able to use critical-thinking and problem-solving skills to develop a research project and/or paper.

## **5. Academic Staff**

Murtadha Mohammed Hamed Ramathan | Ph.D. in Exploration and Data Warehouse | Professor

## 6. Credits, Grading and GPA

### Credits

University of Anbar is following the Bologna Process with the European Credit Transfer System (ECTS) credit system. The total degree program number of ECTS is 240, 30 ECTS per semester. 1 ECTS is equivalent to 25 hrs student workload, including structured and unstructured workload.

### Grading

Before the evaluation, the results are divided into two subgroups: pass and fail. Therefore, the results are independent of the students who failed a course. The grading system is defined as follows:

GRADING SCHEME				
مخطط الدرجات				
Group	Grade	التقدير	Marks (%)	Definition
Success Group (50 - 100)	A - Excellent	امتياز	90 - 100	Outstanding Performance
	B - Very Good	جيد جدا	80 - 89	Above average with some errors
	C - Good	جيد	70 - 79	Sound work with notable errors
	D - Satisfactory	متوسط	60 - 69	Fair but with major shortcomings
	E - Sufficient	مقبول	50 - 59	Work meets minimum criteria
Fail Group (0 - 49)	FX – Fail	راسب - قيد المعالجة	(45-49)	More work required but credit awarded
	F – Fail	راسب	(0-44)	Considerable amount of work required

Note:				
<p>Number Decimal places above or below 0.5 will be rounded to the higher or lower full mark (for example a mark of 54.5 will be rounded to 55, whereas a mark of 54.4 will be rounded to 54. The University has a policy NOT to condone "near-pass fails" so the only adjustment to marks awarded by the original marker(s) will be the automatic rounding outlined above.</p>				

### ***Calculation of the Cumulative Grade Point Average (CGPA)***

1. The CGPA is calculated by the summation of each module score multiplied by its ECTS, all are divided by the program total ECTS.

CGPA of a 4-year B.Sc. degree:

$$\text{CGPA} = [ (1^{\text{st}} \text{ module score} \times \text{ECTS}) + (2^{\text{nd}} \text{ module score} \times \text{ECTS}) + \dots ] / 240$$

## **7. Curriculum/Modules**

### **Semester 1 | 30 ECTS | 1 ECTS = 25 hrs**

Module 12	#REF!	#REF!	#REF!	#REF!	#REF!	#REF!	#REF!	#REF!
Description								
The Data Structures and Algorithms course is a cornerstone of the Computer Science curriculum, offering an in-depth exploration of fundamental concepts and techniques essential for solving complex computational problems efficiently. This course equips students with the knowledge and skills required to design, analyze, and implement data structures and algorithms, which are fundamental to computer science and software engineering.								
Module 13	#REF!	#REF!	#REF!	#REF!	#REF!	#REF!	#REF!	#REF!
Description								
The Computational Theory course is a fundamental component of the Computer Science curriculum that explores the theoretical underpinnings of computation. This course delves into abstract models of computation, formal languages, and the limits of algorithmic solvability. It provides students with the theoretical foundations necessary to analyze and understand the capabilities and limitations of computers and algorithms.								
Module 14	#REF!	#REF!	#REF!	#REF!	#REF!	#REF!	#REF!	#REF!
Description								
The Introduction to Electronic Information Systems course is designed to provide students with a foundational understanding of electronic information systems and their role in modern computing and information management. This course explores the principles, technologies, and applications of electronic information systems, equipping students with essential knowledge and skills for managing and processing digital information.								
Module 15	#REF!	#REF!	#REF!	#REF!	#REF!	#REF!	#REF!	#REF!
Description								
The Design and Analysis of Information Systems course is a pivotal component of the Computer Science curriculum that focuses on the principles, methodologies, and best practices for designing, developing, and analyzing complex information systems. This course empowers students with the knowledge and skills necessary to create robust, efficient, and scalable information systems that meet real-world business and technology requirements.								
Module 16	#REF!	#REF!	#REF!	#REF!	#REF!	#REF!	#REF!	#REF!
Description								
The Democracy and Human Rights course in the first stage is designed to provide students with a fundamental understanding of the concepts, theories, and historical development of democracy and human rights. This introductory course aims to foster critical thinking and awareness of the importance of these principles in contemporary global society.								
Module 17	#REF!	#REF!	#REF!	#REF!	#REF!	#REF!	#REF!	#REF!
Description								
This Course Specification provides a concise summary of the main features of the course and the learning outcomes that a typical student might reasonably be expected to achieve and demonstrate if he/she takes full advantage of the learning opportunities that are provided. It should be cross-referenced with the programme specification.								
Module 18	#REF!	#REF!	#REF!	#REF!	#REF!	#REF!	#REF!	#REF!
Description								
The study of structured programming, entity programming and what is known as object-oriented programming, knowledge of injunctions and functions to prepare the student to know how to write a set of commands, knowing what are injunctions, how to build classes and objects, what the class has of properties and functions, how to build several classes and several objects, and how properties are inherited between								

them.

									them.
Module 19	#REF!	#REF!	#REF!	#REF!	#REF!	#REF!	#REF!	#REF!	
	Description								
	This Course Specification provides a concise summary of the main features of the course and the learning outcomes that a typical student might reasonably be expected to achieve and demonstrate if he/she takes full advantage of the learning opportunities that are provided. It should be cross-referenced with the programme specification.								
Module 20	#REF!	#REF!	#REF!	#REF!	#REF!	#REF!	#REF!	#REF!	
	Description								
	The Web Technologies course is designed to provide students with a comprehensive understanding of the technologies and principles that underlie the World Wide Web. In an era where the web plays a crucial role in communication, commerce, and information dissemination, this course equips students with the knowledge and skills necessary to design, develop, and manage modern web applications.								
Module 21	#REF!	#REF!	#REF!	#REF!	#REF!	#REF!	#REF!	#REF!	
	Description								
	The Design Internet Pages course is designed to provide students with the knowledge and skills needed to create attractive, functional, and user-friendly web pages. In today's digital age, effective web design is crucial for businesses, organizations, and individuals. This course equips students with the tools and techniques required to design visually appealing and responsive web pages that meet modern web standards.								
Module 22	#REF!	#REF!	#REF!	#REF!	#REF!	#REF!	#REF!	#REF!	
	Description								
	Studying the numerical analysis, methods, applications and its relationship with the real problems. Teach train the students to deal with the numerical process in the future in logic and right style.								
Module 23	#REF!	#REF!	#REF!	#REF!	#REF!	#REF!	#REF!	#REF!	
	Description								
	This Course Specification provides a concise summary of the main features of the course and the learning outcomes that a typical student might reasonably be expected to achieve and demonstrate if he/she takes full advantage of the learning opportunities that are provided. It should be cross-referenced with the programme specification.								
Module 24	#REF!	#REF!	#REF!	#REF!	#REF!	#REF!	#REF!	#REF!	
	Description								
	NOT YET								
Module 24	#REF!	#REF!	#REF!	#REF!	#REF!	#REF!	#REF!	#REF!	
	Description								
	This Course Specification provides a concise summary of the main features of the course and the learning outcomes that a typical student might reasonably be expected to achieve and demonstrate if he/she takes full advantage of the learning opportunities that are provided. It should be cross-referenced with the								

programme specification.

Module 25	#REF!	#REF!	#REF!	#REF!	#REF!	#REF!	#REF!	#REF!
-----------	-------	-------	-------	-------	-------	-------	-------	-------

#### Description

Principles of Computer Communications and Networks Detailed Syllabus for B.Tech third year First semester is covered here. This gives the details about credits, number of hours and other details along with reference books for the course. Course objectives: To understand the concept of computer communication, To learn about the networking concept, layered protocols, To understand various communications concepts, and To get the knowledge of various networking equipment.

Module 26	#REF!	#REF!	#REF!	#REF!	#REF!	#REF!	#REF!	#REF!
-----------	-------	-------	-------	-------	-------	-------	-------	-------

#### Description

The Distributed Database Management Systems course is a specialized offering in the field of computer science, focusing on the principles, technologies, and strategies for managing databases across distributed and interconnected environments. In today's interconnected world, where data is generated and consumed across various locations and platforms, this course equips students with the knowledge and skills required to design, deploy, and manage distributed database systems effectively.

Module 27	#REF!	#REF!	#REF!	#REF!	#REF!	#REF!	#REF!	#REF!
-----------	-------	-------	-------	-------	-------	-------	-------	-------

#### Description

The Natural Language Processing (NLP) course is designed to introduce students to the interdisciplinary field that combines computer science, artificial intelligence, and linguistics. NLP focuses on the interaction between computers and human language, enabling machines to understand, interpret, and generate human language text. This course provides students with a strong foundation in NLP techniques and applications.

Module 28	#REF!	#REF!	#REF!	#REF!	#REF!	#REF!	#REF!	#REF!
-----------	-------	-------	-------	-------	-------	-------	-------	-------

#### Description

This Course Specification provides a concise summary of the main features of the course and the learning outcomes that a typical student might reasonably be expected to achieve and demonstrate if he/she takes full advantage of the learning opportunities that are provided. It should be cross-referenced with the programme specification.

Module 29	#REF!	#REF!	#REF!	#REF!	#REF!	#REF!	#REF!	#REF!
-----------	-------	-------	-------	-------	-------	-------	-------	-------

#### Description

This Course Specification provides a concise summary of the main features of the course and the learning outcomes that a typical student might reasonably be expected to achieve and demonstrate if he/she takes full advantage of the learning opportunities that are provided. It should be cross-referenced with the programme specification.

Module 30	#REF!	#REF!	#REF!	#REF!	#REF!	#REF!	#REF!	#REF!
-----------	-------	-------	-------	-------	-------	-------	-------	-------

#### Description

Artificial Intelligence I is an introductory course that explores the fundamental principles and techniques underlying the field of artificial intelligence (AI). This course provides students with a comprehensive introduction to AI concepts, algorithms, and applications, equipping them with the knowledge and skills needed to understand, design, and implement AI systems.

Module 31	#REF!	#REF!	#REF!	#REF!	#REF!	#REF!	#REF!	#REF!
-----------	-------	-------	-------	-------	-------	-------	-------	-------

#### Description

This Course Specification provides a concise summary of the main features of the course and the learning outcomes that a typical student might reasonably be expected to achieve and demonstrate if he/she takes

full advantage of the learning opportunities that are provided. It should be cross-referenced with the programme specification.

Module 32	#REF!	#REF!	#REF!	#REF!	#REF!	#REF!	#REF!	#REF!
-----------	-------	-------	-------	-------	-------	-------	-------	-------

#### Description

Artificial Intelligence II is an advanced course that builds upon the foundational concepts introduced in Artificial Intelligence I. This course delves deeper into the theory and applications of artificial intelligence, focusing on advanced topics, cutting-edge research, and practical AI development. It provides students with the opportunity to explore and apply more complex AI algorithms and techniques.

Module 33	#REF!	#REF!	#REF!	#REF!	#REF!	#REF!	#REF!	#REF!
-----------	-------	-------	-------	-------	-------	-------	-------	-------

#### Description

The Data Storage Engineering course is designed to provide students with an in-depth understanding of the principles, technologies, and best practices related to data storage and management in modern computing systems. In today's data-driven world, the effective storage and retrieval of data are critical for businesses and organizations. This course equips students with the knowledge and skills needed to design, implement, and optimize data storage solutions.

Module 34	#REF!	#REF!	#REF!	#REF!	#REF!	#REF!	#REF!	#REF!
-----------	-------	-------	-------	-------	-------	-------	-------	-------

#### Description

This Course Specification provides a concise summary of the main features of the course and the learning outcomes that a typical student might reasonably be expected to achieve and demonstrate if he/she takes full advantage of the learning opportunities that are provided. It should be cross-referenced with the programme specification.

Module 35	#REF!	#REF!	#REF!	#REF!	#REF!	#REF!	#REF!	#REF!
-----------	-------	-------	-------	-------	-------	-------	-------	-------

#### Description

This Course Specification provides a concise summary of the main features of the course and the learning outcomes that a typical student might reasonably be expected to achieve and demonstrate if he/she takes full advantage of the learning opportunities that are provided. It should be cross-referenced with the programme specification.

Module 36	#REF!	#REF!	#REF!	#REF!	#REF!	#REF!	#REF!	#REF!
-----------	-------	-------	-------	-------	-------	-------	-------	-------

#### Description

A decision support system is an interactive computer application that has complete access to information about your organization. Each student will get "hands-on" experience with the development of a decision support system/expert system. When used, it offers comparative figures between one period and the next. It projects revenue figures based on assumptions related to product sales. A DSS is smart enough to help you understand the expenses involved in and consequences resulting from different decision alternatives

Module 37	#REF!	#REF!	#REF!	#REF!	#REF!	#REF!	#REF!	#REF!
-----------	-------	-------	-------	-------	-------	-------	-------	-------

#### Description

This Course Specification provides a concise summary of the main features of the course and the learning outcomes that a typical student might reasonably be expected to achieve and demonstrate if he/she takes full advantage of the learning opportunities that are provided. It should be cross-referenced with the programme specification.

Module 38	#REF!	#REF!	#REF!	#REF!	#REF!	#REF!	#REF!	#REF!
-----------	-------	-------	-------	-------	-------	-------	-------	-------

#### Description

This course is to cover the concepts, structure, and functions of Multimedia Computing To give students a broad grounding in issue surrounding multimedia. including the role of and design of multimedia Systems

...and generating interactive multimedia; illustrating the role of and design of multimedia systems which incorporate digital audio, graphics and video, underlying concepts and representations of sound, pictures and video, data compression and transmission, integration of media, multimedia authoring, and delivery of multimedia.

Module 39	#REF!	#REF!	#REF!	#REF!	#REF!	#REF!	#REF!	#REF!
-----------	-------	-------	-------	-------	-------	-------	-------	-------

#### Description

The Cloud Computing course is designed to provide students with a comprehensive understanding of cloud technologies, their architecture, and their applications in modern computing environments. Cloud computing has revolutionized the way businesses and organizations manage and deliver IT services. This course equips students with the knowledge and skills necessary to design, deploy, and manage cloud-based solutions effectively.

Module 40	#REF!	#REF!	#REF!	#REF!	#REF!	#REF!	#REF!	#REF!
-----------	-------	-------	-------	-------	-------	-------	-------	-------

#### Description

This Course Specification provides a concise summary of the main features of the course and the learning outcomes that a typical student might reasonably be expected to achieve and demonstrate if he/she takes full advantage of the learning opportunities that are provided. It should be cross-referenced with the programme specification.

Module 41	#REF!	#REF!	#REF!	#REF!	#REF!	#REF!	#REF!	#REF!
-----------	-------	-------	-------	-------	-------	-------	-------	-------

#### Description

Operating Systems I is a foundational course in computer science that provides students with a comprehensive introduction to the principles, design, and functioning of operating systems. Operating systems are the core software that manages computer hardware and facilitates application execution. This course equips students with the knowledge and skills needed to understand, design, and implement basic operating system components.

Module 42	#REF!	#REF!	#REF!	#REF!	#REF!	#REF!	#REF!	#REF!
-----------	-------	-------	-------	-------	-------	-------	-------	-------

#### Description

Programming of web Applications Detailed Syllabus for B.Tech fourth year First semester is covered here. This gives the details about credits, number of hours and other details along with reference books for the course. The course covers construction and design of dynamic web pages. The emphasis lies on standardised HTML and CSS to create structure and appearance. The course also covers basic JavaScript to create a dynamic behaviour on web sites.

Other parts that are covered are availability, responsive design and validation of web pages

Module 43	#REF!	#REF!	#REF!	#REF!	#REF!	#REF!	#REF!	#REF!
-----------	-------	-------	-------	-------	-------	-------	-------	-------

#### Description

The Research Methodology in Computer Science course is designed to provide students with the knowledge and skills necessary to conduct effective and rigorous research in the field of computer science. This course emphasizes the research process, methodologies, techniques, and ethical considerations, enabling students to plan, execute, and report on their research effectively.

Module 44	#REF!	#REF!	#REF!	#REF!	#REF!	#REF!	#REF!	#REF!
-----------	-------	-------	-------	-------	-------	-------	-------	-------

#### Description

This Course Specification provides a concise summary of the main features of the course and the learning outcomes that a typical student might reasonably be expected to achieve and demonstrate if he/she takes full advantage of the learning opportunities that are provided. It should be cross-referenced with the programme specification.

Module 45	#REF!	#REF!	#REF!	#REF!	#REF!	#REF!	#REF!	#REF!
-----------	-------	-------	-------	-------	-------	-------	-------	-------

#### Description

This Course Specification provides a concise summary of the main features of the course and the learning outcomes that a typical student might reasonably be expected to achieve and demonstrate if he/she takes full advantage of the learning opportunities that are provided. It should be cross-referenced with the programme specification.

Module 46	#REF!	#REF!	#REF!	#REF!	#REF!	#REF!	#REF!	#REF!
-----------	-------	-------	-------	-------	-------	-------	-------	-------

#### Description

The Information Technology Governance course is designed to provide students with a comprehensive understanding of the principles, frameworks, and practices related to the governance of information technology within organizations. In today's digital age, effective IT governance is crucial for ensuring that IT resources are aligned with business goals, risks are managed, and compliance requirements are met. This course equips students with the knowledge and skills needed to establish and maintain effective IT governance practices.

Module 47	#REF!	#REF!	#REF!	#REF!	#REF!	#REF!	#REF!	#REF!
-----------	-------	-------	-------	-------	-------	-------	-------	-------

#### Description

This Course Specification provides a concise summary of the main features of the course and the learning outcomes that a typical student might reasonably be expected to achieve and demonstrate if he/she takes full advantage of the learning opportunities that are provided. It should be cross-referenced with the programme specification.

Module 48	#REF!	#REF!	#REF!	#REF!	#REF!	#REF!	#REF!	#REF!
-----------	-------	-------	-------	-------	-------	-------	-------	-------

#### Description

The Data Warehouse and Data Mining course is designed to provide students with a deep understanding of the concepts, technologies, and techniques related to data warehousing and data mining. In today's data-driven world, organizations rely on these disciplines to extract valuable insights from vast amounts of data. This course equips students with the knowledge and skills required to design, implement, and leverage data warehouses and data mining tools effectively.

Module 49	#REF!	#REF!	#REF!	#REF!	#REF!	#REF!	#REF!	#REF!
-----------	-------	-------	-------	-------	-------	-------	-------	-------

#### Description

Operating Systems II is an advanced course that continues to explore the principles, design, and functioning of operating systems, building upon the knowledge acquired in Operating Systems I. This course delves deeper into operating system concepts, advanced topics, and hands-on implementation, providing students with a comprehensive understanding of modern operating systems and their components.

Module 50	#REF!	#REF!	#REF!	#REF!	#REF!	#REF!	#REF!	#REF!
-----------	-------	-------	-------	-------	-------	-------	-------	-------

#### Description

The Project in Computer Science course is a capstone experience designed to integrate and apply the knowledge and skills acquired throughout the computer science program. It offers students the opportunity to work on a substantial project that addresses real-world challenges or explores advanced topics in computer science. This course serves as a culmination of their academic journey, allowing them to demonstrate their expertise in planning, designing, developing, and presenting a significant computing project.

## MODULE DESCRIPTOR FORM

Module Information				
Module Title	Structured programming I		Module Type	TYPE C
Module Code	ISSP101	ECTS Credits		8
Module Level	UGI	Semester of Delivery		One
Administering Department	IS	Faculty	CSIT	
Module Leader	Mahmoud Hilal	e-mail	mah2005hilal@uoanbar.edu.iq	
Module Leader's Acad. Title	Lecturer	Module Leader's Qualification		PhD
Module Tutor		e-mail		
Peer Reviewer Name	/	e-mail	/	
Review Committee Approval	DD/MM/YY	Version Number	1.0	

Relation With Other Modules	
Pre-requisites	/
Co-requisites	/
Module Aims, Learning Outcomes and Indicative Contents	
Module Aims	Learn how to use the Advanced Tools helps programmers write fast, portable programs The main principles of programming and the development of programming languages Learn the principles of Structure programming
Module Learning Outcomes	A1- Knowledge and understanding A2. Learn algorithms A3. Learn flowcharts

	A4. Learn structured programming A5. Learn Python programming
<b>Indicative Contents</b>	
<b>Learning and Teaching Strategies</b>	
<b>Strategies</b>	<p>The main strategy that will be adopted in delivering this module are:</p> <ol style="list-style-type: none"> <li>1. Power point presentation (Data show).</li> <li>2. Explanation on the white board using different color markers.</li> <li>3. Discussions with the student during teaching.</li> <li>4. Interaction with students through daily problems practice through lecture.</li> <li>5. Solve different problems with more exercises.</li> <li>6. Submit assignment that develop student learning.</li> </ol>

<b>Module Delivery</b>	
<b>Structured workload (h/w)</b>	5.4
<b>Unstructured workload (h/w)</b>	8
<b>Total workload (h/w)</b>	13.4

<b>Module Evaluation</b>				
	<b>Time/Number</b>	<b>Weight (Marks)</b>	<b>Week Due</b>	<b>Relevant Learning Outcome</b>
<b>Quizzes</b>	3	6% (6)	3,7 and 11	
<b>Assignments</b>	2	6% (6)	2 and 12	
<b>Projects / Lab.</b>	1	15% (15)	Continuous	
<b>Report</b>	1	5% (5)	13	
<b>Midterm Exam</b>	2 hr	18% (18)	7	
<b>Final Exam</b>	3 hr	50% (50)	16	
<b>Total</b>		100% (100 Marks)		

<b>Learning and Teaching Resources</b>		
	<b>Text</b>	<b>Available in the Library?</b>

<b>Required Texts</b>	"Starting Out with Python plus My Programming Lab with Pearson Text --Access Card Package (3rd Edition) Tony Gaddis ISBN-13: 978-0133862256"	Yes/No
<b>Recommended Texts</b>		Yes/No
<b>Websites</b>		

Course Structure					
Week	Hours	ILOs	Unit/Module or Topic Title	Teaching Method	Assessment Method
First	3 h.	Programming principles	Overview to Programming Language	Explain Menu, Getting Started with python	
Second	3 h.	Algorithms	Algorithms and Flow Charts	Algorithms and Flow Charts	
Third	3 h.	Introduction to Programming	Storing and Manipulating Values Calling Functions Comments Formatting Values Working with Strings Exercises	Storing and Manipulating Values Calling Functions Comments Formatting Values Working with Strings Exercises	Quiz
Fourth	3 h.	Unary Operators	Unary Minus Increment and /decrement Operators.	Program of Unary Minus Increment and /decrement Operators.	
Fifth	3 h.	Operational Operators	Operational Assignment Operators Relational Operators Logical Operators. Bitwise Operator Logical Operators. Bitwise Operator	Program Operational Assignment Operators Relational Operators Program Logical Operators. Bitwise Operator	
Sixth	3 h.	Selection Statements	Boolean Logic If Statements If-Else Statements	Programs in Lectures	Quiz

#### APPENDIX:

UNIVERSITY of Anbar				
GRADING SCHEME				
Group	ECTS Grade	% of Students/Marks	Definition	GPA
<b>Success Group (50 - 100)</b>	<b>A</b> - Excellent	Best 10%	Outstanding Performance	<b>5</b>
	<b>B</b> - Very Good	Next 25%	Above average with some errors	<b>4</b>
	<b>C</b> - Good	Next 30%	Sound work with notable errors	<b>3</b>
	<b>D</b> - Satisfactory	Next 25%	Fair but with major shortcomings	<b>2</b>
	<b>E</b> - Sufficient	Next 10%	Work meets minimum criteria	<b>1</b>
<b>Fail Group (0 – 49)</b>	<b>FX</b> – Fail	(45-49)	More work required but credit awarded	
	<b>F</b> – Fail	(0-44)	Considerable amount of work required	

#### Note:

NB Decimal places above or below 0.5 will be rounded to the higher or lower full mark (for example a mark of 54.5 will be rounded to 55, whereas a mark of 54.4 will be rounded to 54. The university has a policy NOT to condone "near-pass fails" so the only adjustment to marks awarded by the original marker(s) will be the automatic rounding outlined above.

## MODULE DESCRIPTOR FORM

Module Information				
Module Title	Fundamental of Information Technology		Module Type	TYPE C
Module Code	ISFI102	ECTS Credits		6
Module Level	UGI	Semester of Delivery		One
Administering Department	IS	Faculty	CSIT	
Module Leader	Mohanad Abdulsalam Younis gedan	e-mail	mohanad.abdul@uoanbar.edu.iq	
Module Leader's Acad. Title	Lecturer	Module Leader's Qualification		Ph. D
Module Tutor		e-mail		
Peer Reviewer Name	/	e-mail	/	
Review Committee Approval	DD/MM/YY	Version Number	2.0	

Relation With Other Modules	
Pre-requisites	/
Co-requisites	/
Module Aims, Learning Outcomes and Indicative Contents	
Module Aims	<ul style="list-style-type: none"> <li>- Provide a basic knowledge of computer hardware and software</li> <li>- Introduce the business areas to which computers may be applied.</li> <li>- Provide an introduction to business organization and information systems.</li> <li>- Develop the skills in network &amp; communication, which play an important part in business computing and information processing.</li> </ul>
Module Learning	A-Knowledge and Understanding

<b>Outcomes</b>	A1. The student should understand the architecture of any IT systems. A2. The student should understand the parts of hardware. A3. The student should understand the system software. A4. The student should understand the architecture of networks, protocols and communications devices.
<b>Indicative Contents</b>	
<b>Learning and Teaching Strategies</b>	
<b>Strategies</b>	The main strategy that will be adopted in delivering this module are: 1. Power point presentation (Data show). 2. Explanation on the white board using different color markers. 3. Discussions with the student during teaching. 4. Interaction with students through daily problems practice through lecture. 5. Solve different problems with more exercises. 6. Submit assignment that develop student learning.

<b>Module Delivery</b>	
<b>Structured workload (h/w)</b>	3.4
<b>Unstructured workload (h/w)</b>	5.6
<b>Total workload (h/w)</b>	10

<b>Module Evaluation</b>				
	<b>Time/Number</b>	<b>Weight (Marks)</b>	<b>Week Due</b>	<b>Relevant Learning Outcome</b>
<b>Quizzes</b>	3	6% (6)	3,7 and 11	
<b>Assignments</b>	2	6% (6)	2 and 12	
<b>Projects / Lab.</b>	1	15% (15)	Continuous	
<b>Report</b>	1	5% (5)	13	
<b>Midterm Exam</b>	2 hr	18% (18)	7	
<b>Final Exam</b>	3 hr	50% (50)	16	
<b>Total</b>		100% (100 Marks)		

Learning and Teaching Resources		
	Text	Available in the Library?
Required Texts		Yes/No
Recommended Texts		Yes/No
Websites		

Delivery Plan (Weekly Syllabus)	
	Material Covered
Week 1	Introduction of Computers and Programming
Week 2	Brief history of computer
Week 3	Generation of Computers & Computer hierarchy
Week 4	Basic Computer Components
Week 5	Computer function (fetch cycle, interrupt cycle, I/O function)
Week 6	Semiconductor main memory (RAM, ROM, CACHE)
Week 7	Mid-Term Exam
Week 8	Computer Software (application software)
Week 9	External & Internal memory
Week 10	Telecommunications system & Network
Week 11	Topology of a network
Week 12	Layering model
Week 13	Protocols
Week 14	addressing communications

<b>Week 15</b>	<b>Preparatory Week</b>
<b>Week 16</b>	<b>Final Exam</b>

Learning and Teaching Resources		
	Text	Available in the Library?
Required Texts		Yes/No
Recommended Texts		Yes/No
Websites		

Delivery Plan (Weekly Syllabus)	
	Material Covered
Week 1	The Definition of the Derivative Interpretation of the Derivative
Week 2	Properties of Derivative , Some laws of derivatives
Week 3	Properties of Derivative , Some laws of derivatives
Week 4	<b>Derivatives of the six trig functions</b>
Week 5	<b>Exponential Functions, Logarithm Functions</b>
Week 6	<b>Inverse Sine, Inverse cosine, Inverse tangent, Alternate Notation</b>
Week 7	<b>Mid-Term Exam</b>
Week 8	<b>Inverse Sine, Inverse cosine, Inverse tangent, Alternate Notation</b>
Week 9	These are the six hyperbolic trig Functions .and They are defined as
Week 10	There are two forms of the chain rule
Week 11	Defined , formula, and used the chain rule
Week 12	first derivative, second derivative, third derivative.
Week 13	the properties of logarithms

<b>Week 14</b>	Introduction, Critical Points and Minimum and Maximum Values
<b>Week 15</b>	Preparatory Week
<b>Week 16</b>	Final Exam

#### APPENDIX:

UNIVERSITYof Anbar				
GRADING SCHEME				
Group	ECTS Grade	% of Students/Marks	Definition	GPA
Success Group (50 - 100)	A - Excellent	Best 10%	Outstanding Performance	5
	B - Very Good	Next 25%	Above average with some errors	4
	C - Good	Next 30%	Sound work with notable errors	3
	D - Satisfactory	Next 25%	Fair but with major shortcomings	2
	E - Sufficient	Next 10%	Work meets minimum criteria	1
Fail Group (0 – 49)	FX – Fail	(45-49)	More work required but credit awarded	
	F – Fail	(0-44)	Considerable amount of work required	
Note:				
NB Decimal places above or below 0.5 will be rounded to the higher or lower full mark (for example a mark of 54.5 will be rounded to 55, whereas a mark of 54.4 will be rounded to 54. The university has a policy NOT to condone "near-pass fails" so the only adjustment to marks awarded by the original marker(s) will be the automatic rounding outlined above.

## MODULE DESCRIPTOR FORM

Module Information				
Module Title	DISCRETE STRUCTURE		Module Type	TYPE B
Module Code	CSIT112	ECTS Credits		6
Module Level	UGI	Semester of Delivery		First
Administering Department	IS	Faculty	CSIT	
Module Leader	Mohanad Abdulsalam younis gedan	e-mail	mohanad.abdul@uoanbar.edu.iq	
Module Leader's Acad. Title	Lecturer	Module Leader's Qualification		Ph. D
Module Tutor		e-mail		
Peer Reviewer Name	/	e-mail	/	
Review Committee Approval	DD/MM/YY	Version Number	2.0	

Relation With Other Modules	
Pre-requisites	/
Co-requisites	/
Module Aims, Learning Outcomes and Indicative Contents	
Module Aims	1-To convey the basic concepts of data structures 2-To understand basic concepts about stacking, queues, lists, trees, and graphs 3-It helps the student to know how to deal with data and how to choose the appropriate graphic structure for it 4-Data structure helps the student to understand the nature of the problem at a deeper level and thus better understanding the world for solving programming problems

<b>Module Learning Outcomes</b>	A- Knowledge and Understanding A1- Know the concept of data structures and how to apply them A2- Understand how to use data structures to know the data to be organized in program memory A3- Understand and know the use of data structures in different real applications A4- Understand and know the methods of different data structures B. Subject-specific skills 1. Providing the student with the skill of applying various data 2- Providing the student with the skill of structuring programs 3- Providing the student with the skill of planning any problem and solving it programmatically 4- Providing the student with the skill of dealing with any type of data
<b>Indicative Contents</b>	
<b>Learning and Teaching Strategies</b>	
<b>Strategies</b>	The main strategy that will be adopted in delivering this module are: 1. Power point presentation (Data show). 2. Explanation on the white board using different color markers. 3. Discussions with the student during teaching. 4. Interaction with students through daily problems practice through lecture. 5. Solve different problems with more exercises. 6. Submit assignment that develop student learning.

<b>Module Delivery</b>	
<b>Structured workload (h/w)</b>	3.4
<b>Unstructured workload (h/w)</b>	6.6
<b>Total workload (h/w)</b>	10

Peer Reviewer Name	/	e-mail	/	
Review Committee Approval	DD/MM/YY	Version Number	2.0	

Relation With Other Modules	
Pre-requisites	ISDC115
Co-requisites	/
Module Aims, Learning Outcomes and Indicative Contents	
Module Aims	<p>In a computer science department, the specific aims of a Mathematics II module can vary depending on the curriculum and the intended learning outcomes. However, here are some common aims of a Mathematics II module in a computer science department:</p> <p>Advanced Algebra and Calculus: The module aims to provide a deeper understanding of advanced algebraic concepts such as matrices, vectors, and complex numbers. It also covers calculus topics including limits, derivatives, and integrals.</p>

	<p>Discrete Mathematics: Discrete mathematics is essential in computer science as it provides the foundation for many algorithms, data structures, and problem-solving techniques. The module aims to introduce topics like logic, set theory, combinatorics, graph theory, and formal languages.</p> <p>Probability and Statistics: Probability theory and statistics play a crucial role in various aspects of computer science, such as machine learning, data analysis, and algorithm design. The module aims to cover probability concepts, random variables, statistical distributions, hypothesis testing, and basic statistical analysis.</p>
<b>Module Learning Outcomes</b>	<p>Understanding Advanced Algebra and Calculus: Students should demonstrate a solid understanding of advanced algebraic concepts, such as matrices, vectors, and complex numbers. They should be able to apply calculus techniques, such as limits, derivatives, and integrals, in the context of computer science problems.</p> <p>Applying Discrete Mathematics: Students should be able to apply discrete mathematics concepts and techniques to solve problems in computer science. This includes understanding and using logic, set theory, combinatorics, graph theory, and formal languages in algorithm design and analysis.</p> <p>Analyzing Probability and Statistics: Students should be able to analyze and interpret probabilistic and statistical data relevant to computer science problems. They should understand concepts such as probability distributions, random variables, hypothesis testing, and basic statistical analysis.</p> <p>Using Numerical Methods: Students should be proficient in using numerical methods to solve computational problems encountered in computer science. This includes employing numerical approximation techniques, solving equations numerically, and performing numerical integration.</p>
<b>Indicative Contents</b>

# University of Anbar Diploma Supplement

Anbar, Ramadi, Iraq

Phone No.:

e-mail: [Contact@uoanbar.edu.iq](mailto:Contact@uoanbar.edu.iq)

URL: <https://www.uoanbar.edu.iq/>

This Diploma Supplement follows the model developed by the European Commission, Council of Europe and UNESCO/CEPES. The purpose of the supplement is to provide sufficient independent data to improve the international 'transparency' and fair academic and professional recognition of qualifications (diplomas, degrees, certificates etc.). It is designed to provide a description of the nature, level, context, content and status of the studies that were pursued and successfully completed by the individual named on the original qualification to which this supplement is appended. It should be free from any value judgements, equivalence statements or suggestions about recognition. Information in all sections should be provided. Where information is not provided, an explanation should give the reason why.

## 1. INFORMATION IDENTIFYING THE HOLDER OF THE QUALIFICATION

- 1.1 First Name:
- 1.2 Second Name:
- 1.3 Third Name:
- 1.4 Date of Birth:
- 1.5 Place of Birth:
- 1.6 Student Identification Number:
- 1.7 National ID number:

## 2. INFORMATION IDENTIFYING THE QUALIFICATION

- 2.1 Name of the Qualification:
- 2.2 Main Field of the Study of the Qualification:
- 2.3 Name and Status of the Awarding Institution:
- 2.4 Language of Instruction/ Examination:

## 3. INFORMATION ON THE LEVEL OF QUALIFICATION

- 3.1 Level of Qualification  
**First Cycle (Bachelor's Degree)**
- 3.2 Official Length of the Programme  
**4 years – 8 Semesters**
- 3.3 Access Requirements  
**High School Diploma – Placement through the National Central Admission Requirements**

#### 4. INFORMATION ON THE CONTENTS AND RESULTS GAINED

##### 4.1 Study System:

**Bologna process**

##### 4.2 Mode of Study

**First Cycle (Bachelor's Degree)**

##### 4.3 Program Requirements

**A Student is required to have a minimum CGPA of 50% and no falling grades**

##### 4.4 Minimum Credits for Semester, Year and Graduation (ECTS)

**30 ECTS/Semester | 60 ECTS/Year | 240 ECTS/Programme | 1 ECTS = 25 hrs**

##### 4.5 Student Learning Outcomes

1. An ability to identify, formulate, and solve complex engineering problems by applying principles of engineering, science, and mathematics
2. An ability to apply engineering design to produce solutions that meet specified needs with consideration of public health, safety, and welfare, as well as global, cultural, social, environmental, and economic factors
3. An ability to communicate effectively with a range of audiences
4. An ability to recognize ethical and professional responsibilities in engineering situations and make informed judgments, which must consider the impact of engineering solutions in global, economic, environmental, and societal contexts
5. An ability to function effectively on a team whose members together provide leadership, create a collaborative and inclusive environment, establish goals, plan tasks, and meet objectives
6. An ability to develop and conduct appropriate experimentation, analyze and interpret data, and use engineering judgment to draw conclusions
7. An ability to acquire and apply new knowledge as needed, using appropriate learning strategies

#### 4.6 Programme Details and the Individual Grade/Marks Obtained

Module Code	Module Name	Type	Mark Grade ECTS
<b>Semester 1</b>

<b>Semester 5</b>			
CSDC310	Visual Programming	Core	6
CSDC311	Computer Graphics	Core	6
CSDC312	Computer Architecture	Core	6
CSDC321	Wireless Networks	Core	6
CSDC323	Mobile Applications Programming	Core	6
Grade Point average (GPA) = ( - )			Total ECTS 30

**Semester 6**

CSDC320	Multimedia	Core	7
CSDE223	Internet of Things	Elective	6
CSDC322	Compilers	Core	7
CSDC313	Software Engineering	Core	6
UOA019	Research methodology	Basic	4

Grade Point Average (GPA) = (      ) Total ECTS    30

**Semester 7**

CSDC410	Operating Systems I	Core	6
CSDC411	Computer Security 1	Core	6
CSDC412	Artificial Intelligence	Core	6
CSDC413	Digital Image Processing	Core	6
CSDE414	Game Programming	Elective	6

Grade Point Average (GPA) = (      ) Total ECTS    30

**Semester 8**

CSDC420	Operating Systems II	Core	95	A	5
CSDC421	Computer Security II	Core	87	B	5
CSDC422	Machine Learning	Core	76	C	6
CSDC423	Web Development	Core	65	D	6
UOA020	Project	Basic	65	D	8

Grade Point Average (GPA) = (      ) Total ECTS    30

**Cumulative Grade Point Average (CGPA) =** **Programme total ECTS    240**

**4.7 Grading Scheme and Grade Distribution Guidance**

Group	Grade	Marks	Definitions
Success Group (50 - 100)	A - Excellent	90 - 100	Outstanding Performance
	B - Very Good	80 - 89	Above average with some errors
	C - Good	70 - 79	Sound work with notable errors
	D - Satisfactory	60 - 69	Fair but with major shortcomings
	E - Sufficient	50 - 59	Work meets minimum criteria
Fail Group (0 – 49)	F - Fail	00 - 49	Considerable amount of work required

Marks with Decimal places above or below 0.5 will be rounded to the higher or lower full mark (for example a mark of 54.5 will be rounded to 55, whereas a mark of 54.4 will be rounded to 54. The University has a policy NOT to condone "near-pass fails" so the only adjustment to marks awarded by the original marker(s) will be the automatic rounding outlined above.

4.8 Overall Classification of the Qualification

**Cumulative Grade Point Average (CGPA) =**

**Final Grade of Degree relative RANK: 4 of 23**

**5. INFORMATION ON THE FUNCTION OF THE QUALIFICATION**

5.1 Access to Further Study

**May apply to second cycle programs**

5.2 Professional Status Conferred

**The degree enables the graduate to exercise the profession**

**6. ADDITIONAL INFORMATION**

6.1 Additional Information

**University of Anbar, College of Computer Science and Information Technology,  
Department of Computer Science**

6.2 Further Information Sources

**University Website** <https://uoanbar.edu.iq/>

**Registration Office e-mail** [xxxxx@uoanbar.edu.iq](mailto:xxxxx@uoanbar.edu.iq)

**7. CERTIFICATION OF THE SUPPLEMENT**

7.1 Date **01.10. 2027**

7.2 Name **Full Name**

7.3 Capacity **University General Registrar**

7.4 Signature

7.5 Official Stamp and Seal

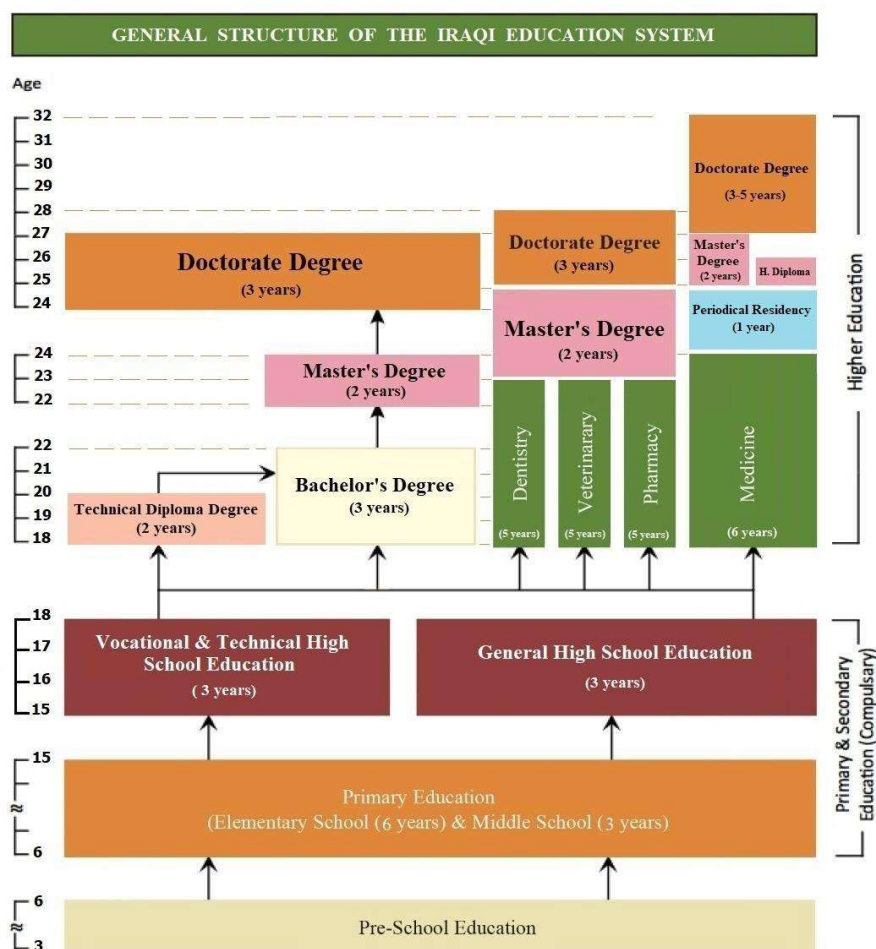

## Structure and Degree System

The basic structure of the Iraqi National Education System consists of stages of noncompulsory pre-school education; Compulsory primary (elementary and middle school) and secondary (high school) education; and higher education. Primary education begins at the age of 6 years (72 months), lasts nine years and comprises six years of elementary and three years of middle school education. Secondary education is three years and divided into two categories as “General High School Education” and “Vocational and Technical High School Education”. The entry into these categories is through composite scores obtained from centralized exam of secondary schools.

Higher Education System is managed by the Ministry of Higher Education and Scientific Research which is responsible for the planning, coordination, governance and supervision of higher education within the provisions set forth in the Constitution of the Republic of Iraq and Higher Education Law. Both state and private universities are founded by law and subjected to the higher education law and to the regulations enacted in accordance with it.

Higher Education in Iraq comprises all post-secondary higher education programs, consisting of short, first, second and third cycle degrees in terms of the terminology of the Bologna Process. Except for the Architectural Engineering, Pharmacy, Dentistry and Veterinary programs, which are five years (300 ECTS), and Medicine Programme which is six years (360 ECTS), the duration of the first cycle (Bachelor degree) is a full-time four years (240 ECTS) study. The duration of the short cycle (Technical Diploma) is a full-time two years (120 ECTS) study.

Graduate level of Study consists of second cycle (master) and third cycle (doctorate) degree programs. The second cycle is a master with thesis with duration of two years (120 ECTS). Third cycle (doctorate) degree programs are completed having earned a minimum of 180 ECTS credits., which consists of completion of courses, passing a proficiency examination and doctoral thesis.

معلومات المادة الدراسية			
Module Title	الحريات وحقوق الانسان		Module Delivery
Module Type	S		<input checked="" type="checkbox"/> Theory <input type="checkbox"/> Lecture <input type="checkbox"/> Lab <input type="checkbox"/> Tutorial <input type="checkbox"/> Practical <input type="checkbox"/> Seminar
Module Code	UOA005		
ECTS Credits	2		
SWL (hr/sem)	50		
Module Level	1	Semester of Delivery	
Administering Department	IS	College	Type College Code
Module Leader	Name	e-mail	E-mail
Module Leader's Acad. Title		Module Leader's Qualification	Ph.D.
Module Tutor	Name (if available)	e-mail	E-mail
Peer Reviewer Name	Name	e-mail	E-mail
Scientific Committee Approval Date	01/06/2023	Version Number	1.0

Relation with other Modules			
العلاقة مع المواد الدراسية الأخرى			
Prerequisite module	None	Semester	
Co-requisites module	None	Semester	

Module Aims, Learning Outcomes and Indicative Contents	
أهداف المادة الدراسية ونتائج التعلم والمحتويات الإرشادية	
Module Objectives أهداف المادة الدراسية	<p>أ. تعليم الطلبة على أساسيات حقوق الإنسان وقوانينها.</p> <p>ب. التعرف على الحقوق وأهم الإشكاليات والتحديات التي تواجهها</p> <p>ج- تحديد وفهم المفاهيم المتعلقة بالحريات، بما في ذلك الحقوق الفردية والحريات الشخصية.</p> <p>د. تنمية القدرة على التفكير النقدي حول القضايا المتعلقة بالحريات والحقوق الفردية.</p>
Module Learning Outcomes مخرجات التعلم للمادة الدراسية	<p>١- أن يعرف الطالب مفهوم الحقوق وقوانينها وتطبيقاتها .</p> <p>٢- أن يعرف الطالب كيفية المشاركة في نشر الحقوق وتطبيقها بالعمل الواقعي الحقيقي.</p> <p>٣- القدرة على استخدام الحقوق وسيلة من أجل التعايش السلمي بين مكونات المجتمع وجميع المخلوقات .</p> <p>٤- القدرة على مشاركة الآخرين في نشر هذه الحقوق .</p> <p>٥- القدرة على تحليل وتعريف مفهوم الحرية والتمييز بين أنواع مختلفة من الحريات.</p> <p>٦- التفاعل مع قضايا الحريات على الصعيدين الوطني والدولي والتأثير في تشكيل الرأي العام.</p>
Indicative Contents المحتويات الإرشادية	<p>الحقوق والحريات الأساسية وغير الأساسية</p> <p>الحقوق والحريات المدنية</p> <p>الحقوق السياسية</p> <p>حقوق الانسان والقانون الدولي الإنساني</p>

Learning and Teaching Strategies	
استراتيجيات التعلم والتعليم	
Strategies	<p>١- المشاركة بالتحضير في قاعة الدرس</p> <p>٢- طريقة الأسئلة والأجوبة في قاعة الدرس</p> <p>٣- الواجبات</p> <p>٤- التقارير</p>

Student Workload (SWL)			
الحمل الدراسي للطلاب محسوب ل ١٥ اسبوعا			
Structured SWL (h/sem) الحمل الدراسي المنتظم للطلاب خلال الفصل	33	Structured SWL (h/w) الحمل الدراسي المنتظم للطلاب أسبوعيا	2
Unstructured SWL (h/sem) الحمل الدراسي غير المنتظم للطلاب خلال الفصل	17	Unstructured SWL (h/w) الحمل الدراسي غير المنتظم للطلاب أسبوعيا	1
Total SWL (h/sem) الحمل الدراسي الكلي للطلاب خلال الفصل	50		

Module Evaluation					
تقييم المادة الدراسية					
		Time/Number	Weight (Marks)	Week Due	Relevant Learning Outcome
Formative assessment	Quizzes	2	10% (10)	5 and 10	LO #1, #2 and #10, #11
	Assignments	2	10% (10)	2 and 12	LO #3, #4 and #6, #7

Module Aims, Learning Outcomes and Indicative Contents	
Module Aims	The aim of studying of discrete mathematics equips you with the tools to analyze and solve problems involving distinct, countable objects. It builds foundational skills in logical reasoning, counting techniques, and analyzing relationships between structures. Mastering these concepts empowers you to tackle problems in various fields, including computer science, cryptography, information theory, and areas of mathematics itself. By understanding the fundamental properties of discrete structures, you gain the ability to model and analyze real-world scenarios with precision and efficiency.

<b>Module Learning Outcomes</b>	A1. Enhanced problem-solving skills A2. Strong foundation in logical thinking A3. Proficiency in counting techniques. A4. Understanding of discrete structures B. Ability to model real-world scenarios
<b>Indicative Contents</b>	
<b>Learning and Teaching Strategies</b>	
<b>Strategies</b>	The main strategy that will be adopted in delivering this module are: 1. Power point presentation (Data show). 2. Explanation on the white board using different color markers. 3. Discussions with the student during teaching. 4. Interaction with students through daily problems practice through lecture. 5. Solve different problems with more exercises. 6. Submit assignment that develop student learning.

<b>Module Delivery</b>	
<b>Structured workload (h/w)</b>	2.34
<b>Unstructured workload (h/w)</b>	4.34
<b>Total workload (h/w)</b>	6.68

<b>Week 10</b>	Second order differential equation
<b>Week 11</b>	Some example
<b>Week 12</b>	Laplace transform
<b>Week 13</b>	Power series , Fourier series
<b>Week 14</b>	Review
<b>Week 15</b>	<b>Preparatory Week</b>

# APPENDIX:

UNIVERSITYof Anbar				
GRADING SCHEME				
Group	ECTS Grade	% of Students/Marks	Definition	GPA
Success Group (50 - 100)	A - Excellent	Best 10%	Outstanding Performance	5
	B - Very Good	Next 25%	Above average with some errors	4
	C - Good	Next 30%	Sound work with notable errors	3
	D - Satisfactory	Next 25%	Fair but with major shortcomings	2
	E - Sufficient	Next 10%	Work meets minimum criteria	1
Fail Group (0 – 49)	FX – Fail	(45-49)	More work required but credit awarded	
	F – Fail	(0-44)	Considerable amount of work required	
Note:				
NB Decimal places above or below 0.5 will be rounded to the higher or lower full mark (for example a mark of 54.5 will be rounded to 55, whereas a mark of 54.4 will be rounded to 54. The university has a policy NOT to condone "near-pass fails" so the only adjustment to marks awarded by the original marker(s) will be the automatic rounding outlined above.

<b>Module Aims, Learning Outcomes and Indicative Contents</b> <b>أهداف المادة الدراسية ونتائج التعلم والمحتويات الإرشادية</b>	
<b>Module Objectives</b> <b>أهداف المادة الدراسية</b>	<p>The Design and Analysis of Information Systems module aims to provide students with a comprehensive understanding of the principles and techniques involved in designing and analyzing complex information systems. The specific aims of this module may include:</p> <p>System Design Principles: The module aims to introduce students to the fundamental principles and concepts involved in designing information systems. This includes understanding system requirements, system modeling techniques, system architecture, and system integration</p>
<b>Module Learning Outcomes</b> <b>مخرجات التعلم للمادة الدراسية</b>	<p>Software Development Lifecycle: Students will learn about the various phases of the software development lifecycle, including requirements gathering, system analysis, system design, implementation, testing, deployment, and maintenance. The aim is to familiarize students with industry-standard practices and methodologies for developing robust and scalable information systems.</p> <p>Database Design and Management: The module aims to provide students with a solid understanding of database design principles and techniques. This includes conceptual data modeling, entity-relationship modeling, normalization, database query languages (e.g., SQL), and database management systems (DBMS).</p>
<b>Indicative Contents</b> <b>المحتويات الإرشادية</b>	<p><b>Indicative content includes the following:</b></p> <p><b>The main strategy that will be adopted in delivering this module are:</b></p> <ol style="list-style-type: none"> <li>1. Power point presentation (Data show).</li> <li>2. Explanation on the white board using different color markers.</li> <li>3. Discussions with the student during teaching.</li> <li>4. Interaction with students through daily problems practice through lecture.</li> <li>5. Solve different problems with more exercises.</li> <li>6. Submit assignment that develop student learning.</li> </ol> <p><b>Modeling and Design:</b> Use a range of specialist models to model the problems of computer and communication systems, such as deadlock, and design efficient and effective handling procedures. [15 hrs]</p> <p><b>Creative:</b> Extend knowledge in information systems to construct specific and effective solution to manage and control computer resources.[11 hrs]</p> <p><b>Presentation:</b> All students should participate in different presentations about different subjects. [11 hrs]</p>

## Learning and Teaching Strategies

## استراتيجيات التعلم والتعليم

<b>Strategies</b>	<ol style="list-style-type: none"> <li>1. Providing students with the fundamentals and topics related to thinking.</li> <li>2. Giving students daily assignments.</li> <li>3. Encouraging the formation of group discussions during the lecture.</li> <li>4. Present stimulating questions during the lecture, such as 'how' and 'why'.</li> </ol>

<b>Module Aims, Learning Outcomes and Indicative Contents</b> <b>أهداف المادة الدراسية ونتائج التعلم والمحتويات الإرشادية</b>	
<b>Module Objectives</b> <b>أهداف المادة الدراسية</b>	<p>Finite automata are useful models for many important kinds of hardware and software. Here are the most important kinds: Software for designing and checking the behavior of digital circuits; The “lexical analyzer” of a typical compiler, that is, the compiler component that breaks the input text into logical units, such as identifiers, keywords, and punctuation; Software for scanning large bodies of text, such as collections of Web pages, to find occurrences of words, phrases, or other patterns; Software for verifying systems of all types that have a finite number of distinct states, such as communication protocols or protocols for secure exchange of information.</p>
<b>Module Learning Outcomes</b> <b>مخرجات التعلم للمادة الدراسية</b>	<ul style="list-style-type: none"> <li>• Knowledge and understanding <ul style="list-style-type: none"> <li>- Acquire a full understanding and mentality of Automata Theory as the basis of all computer science languages design</li> <li>- Have a clear understanding of the Automata theory concepts such as RE's, DFA's, NFA's, Stack's, Turing machines, and Grammars</li> </ul> </li> <li>• Cognitive skills (thinking and analysis). <ul style="list-style-type: none"> <li>- Be able to design FAs, NFAs, Grammars, languages modelling, small compilers basics</li> <li>- Be able to design sample automata</li> </ul> </li> <li>• Communication skills (personal and academic). <ul style="list-style-type: none"> <li>- Be able to minimize FA's and Grammars of Context Free Languages</li> </ul> </li> <li>• Practical and subject specific skills (Transferable Skills).</li> </ul>
<b>Indicative Contents</b> <b>المحتويات الإرشادية</b>	<ul style="list-style-type: none"> <li>• Training in the applied use of key coding languages for creative computing</li> <li>• Training in key frameworks for creative computing</li> <li>• Introduction to online collaboration for creative computing</li> </ul>

## MODULE DESCRIPTOR FORM

Module Information				
Module Title	Object Oriented Programming II		Module Type	TYPE C
Module Code	ISOO401	ECTS Credits		8
Module Level	UGII	Semester of Delivery		Four
Administering Department	IS	Faculty	CSIT	
Module Leader	Doaa Yaseen Khudhur Abdul Rahman Al-ani	e-mail	co.doaa.yassin@uoanbar.edu.iq	
Module Leader's Acad. Title	Lecturer	Module Leader's Qualification		
Module Tutor		e-mail		
Peer Reviewer Name	/	e-mail	/	
Review Committee Approval	DD/MM/YY	Version Number	2.0	

Relation With Other Modules	
Pre-requisites	
Co-requisites	
Module Aims, Learning Outcomes and Indicative Contents	
Module Aims	<p>The student's acquisition of the concept of entity programming, classes, and objects, and how to deal with them.</p> <p>Clarify the concept of classes, what are the functions and properties of them, and the objects of each class.</p> <p>Giving the student experience in dealing with objects and classes and the distribution of properties and functions. The study of structured</p>

	programming, entity programming and what is known as object-oriented programming, knowledge of injunctions and functions to prepare the student to know how to write a set of commands, knowing what are injunctions, how to build classes and objects, what the class has of properties and functions, how to build several classes and several objects, and how properties are inherited between them.
<b>Module Learning Outcomes</b>	<p>A Knowledge and Understanding</p> <p>A1. Gain the ability and skill to distinguish and deal with program instructions and functions of entity programming.</p> <p>A2- Acquire the skill of distinguishing between objects, classes and functions and linking them.</p> <p>A3- Dealing with the attributes and characteristics of each class and programming functions.</p> <p>B. Subject-specific skills</p> <p>B1. summer training</p> <p>B2. Graduate Research</p> <p>B3. Scientific Reports</p>
<b>Indicative Contents</b>	
<b>Learning and Teaching Strategies</b>	
<b>Strategies</b>	<p>The main strategy that will be adopted in delivering this module are:</p> <ol style="list-style-type: none"> <li>1. Power point presentation (Data show).</li> <li>2. Explanation on the white board using different color markers.</li> <li>3. Discussions with the student during teaching.</li> <li>4. Interaction with students through daily problems practice through lecture.</li> <li>5. Solve different problems with more exercises.</li> <li>6. Submit assignment that develop student learning.</li> </ol>

Delivery Plan (Weekly Syllabus)	
	Material Covered
Week 1	Introduction to Operator Overloading
Week 2	Operator Overloading Using Member Functions
Week 3	Unary Operators Overloading
Week 4	Operator Overloading Tips and Restrictions
Week 5	Nonmember Operator Functions
Week 6	Using a Friend to Overload a Unary Operator

<b>Week 7</b>	Overloading the Relational and Logical Operators
<b>Week 8</b>	Introducing Inheritance
<b>Week 9</b>	Base Class Access Control
<b>Week 10</b>	Using protected Members
<b>Week 11</b>	Inheriting Multiple Base Classes
<b>Week 12</b>	Constructors, Destructors, and Inheritance
<b>Week 13</b>	Passing Parameters to Base Class Constructors
<b>Week 14</b>	Virtual Base Classes
<b>Week 15</b>	Final Exam

#### APPENDIX:

UNIVERSITY of Anbar				
GRADING SCHEME				
Group	ECTS Grade	% of Students/Marks	Definition	GPA
Success Group (50 - 100)	A - Excellent	Best 10%	Outstanding Performance	5
	B - Very Good	Next 25%	Above average with some errors	4
	C - Good	Next 30%	Sound work with notable errors	3
	D - Satisfactory	Next 25%	Fair but with major shortcomings	2
	E - Sufficient	Next 10%	Work meets minimum criteria	1
Fail Group (0 – 49)	FX – Fail	(45-49)	More work required but credit awarded	
	F – Fail	(0-44)	Considerable amount of work required	
Note:				
NB Decimal places above or below 0.5 will be rounded to the higher or lower full mark (for example a mark of 54.5 will be rounded to 55, whereas a mark of 54.4 will be rounded to 54. The university has a policy NOT to condone "near-pass fails" so the only adjustment to marks awarded by the original marker(s) will be the automatic rounding outlined above.

<b>Module Aims, Learning Outcomes and Indicative Contents</b> <b>أهداف المادة الدراسية ونتائج التعلم والمحتويات الإرشادية</b>	
<b>Module Objectives</b> <b>أهداف المادة الدراسية</b>	<p>The module aims to build a strong foundation in algorithms by introducing their fundamental principles, characteristics, and importance in problem-solving. Learners will explore algorithm analysis techniques, focusing on time and space complexity using Big-O notation. The course emphasizes algorithm design and development, including problem-solving paradigms like recursion. Core topics include searching and sorting algorithms, highlighting their efficiency and real-world applications. Additionally, learners will implement graph-based algorithms for traversal, shortest paths, and network optimization. By the end of the module, students will be proficient in analyzing, designing, and coding efficient algorithms to solve diverse computational problems.</p>
<b>Module Learning Outcomes</b> <b>مخرجات التعلم للمادة الدراسية</b>	<p>By the end of this module, learners will be able to:</p> <ol style="list-style-type: none"> <li>1. Comprehend fundamental concepts of algorithms, their characteristics, and their role in problem-solving.</li> <li>2. Analyze algorithms using time and space complexity, employing Big-O notation to evaluate performance.</li> <li>3. Design and develop algorithms using paradigms like recursion, divide-and-conquer, and dynamic programming.</li> <li>4. Implement and compare searching algorithms (e.g., binary search) and sorting algorithms (e.g., quicksort, mergesort) for efficiency and application.</li> <li>5. Develop and apply graph algorithms, including traversal (DFS, BFS), shortest path (</li> <li>6. Solve computational problems with well-optimized algorithmic solutions.</li> </ol>
<b>Indicative Contents</b> <b>المحتويات الإرشادية</b>	<p><b>Indicative content includes the following:</b></p> <p><b>The main strategy that will be adopted in delivering this module are:</b></p> <ol style="list-style-type: none"> <li>1. Power point presentation (Data show).</li> <li>2. Explanation on the white board using different color markers.</li> <li>3. Discussions with the student during teaching.</li> <li>4. Interaction with students through daily problems practice through lecture.</li> <li>5. Solve different problems with more exercises.</li> <li>6. Submit assignment that develop student learning.</li> </ol> <p><b>Modeling and Design:</b> Use a range of specialist models to model the problems of computer and communication systems, such as deadlock, and design efficient and effective handling procedures. [15 hrs]</p> <p><b>Creative:</b> Extend knowledge in information systems to construct specific and effective solution to manage and control computer resources. [11 hrs]</p> <p><b>Presentation:</b> All students should participate in different presentations about different subjects. [11 hrs]</p>
